

# **BIT-MIRTH Corporation**

## **No Hydrogen Embrittlement Even at -60° C**

(Special Treatment)

Fast Drilling Performance

Available Length: Up to 600 mm with #1~#6 Point

Self-Drilling Through Hard Metal Sheet **HRC79-91**

\*  
**Samples Available Upon Request!**

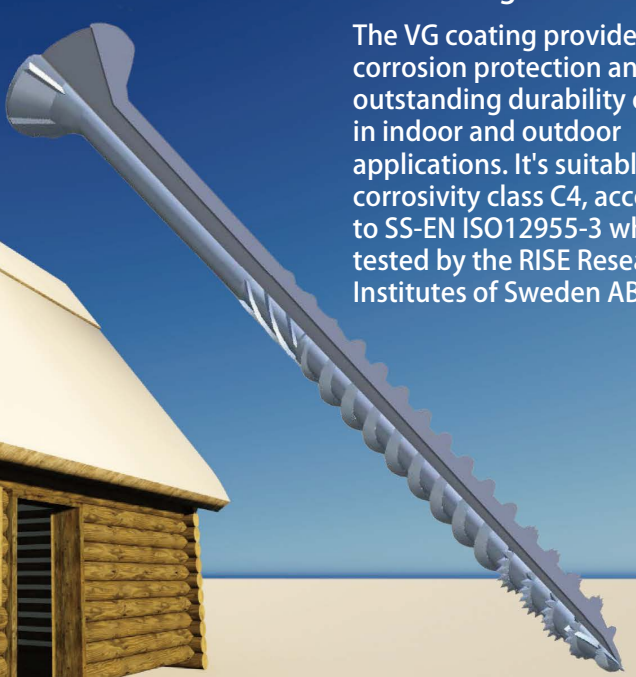

Other counterparts are prone to crack under extreme temperature

**No1 quality drilling point**  
**Applicable to steel plates (upon request)**

The Best Fasteners for Your  
Wooden Projects! Strong and  
Reliable.

### VG Coating

The VG coating provides the corrosion protection and outstanding durability of fixing in indoor and outdoor applications. It's suitable for corrosivity class C4, according to SS-EN ISO12955-3 which is tested by the RISE Research Institutes of Sweden AB.

**Class 4** Proved and  
Certified for most extreme  
weather condition!

Special features: Quality Steel Made, Durable and Powerful  
Zinc Plated, Strong Surface Treatment Preventing any Corrosion and Damage.  
Class 4 VG Coating Certified and Proved by RISE Research Institute.  
Outstanding anti-corrosion protection for indoor and outdoor applications.
